

Problem Set

21. October 2021

Time: 12:00 – 13:00 h

Location: 5174.0178

1. Reaction of the week: by Ning Wei (Beil group).
2. (Retro-)Synthesis: identify key disconnections and come up with a reasonable forward synthesis. Start with realistic commercial substrates, state reaction conditions precisely, consider protecting group strategies, and try to make your synthesis as elegant as possible (apply modern organic chemistry).

Comments:

- nucleophilicity of piperazine amines in amidation step?
- o-nitroaniline not nucleophilic enough?
